Create new Blank Card Definition

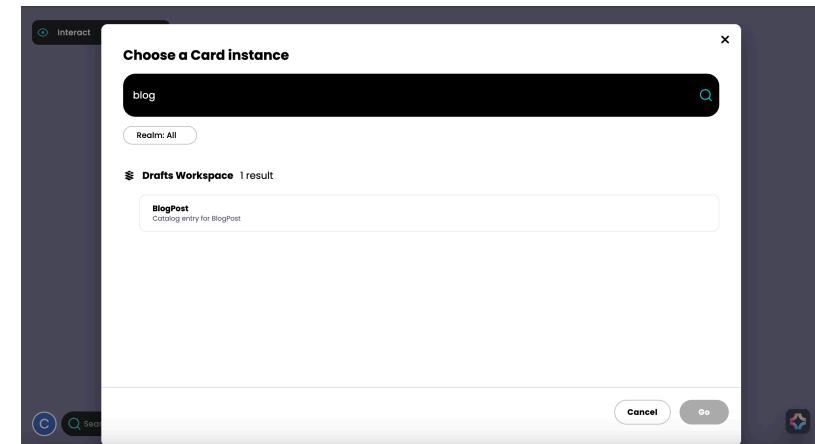

You can edit the module from the Code Editor

You can add a Field

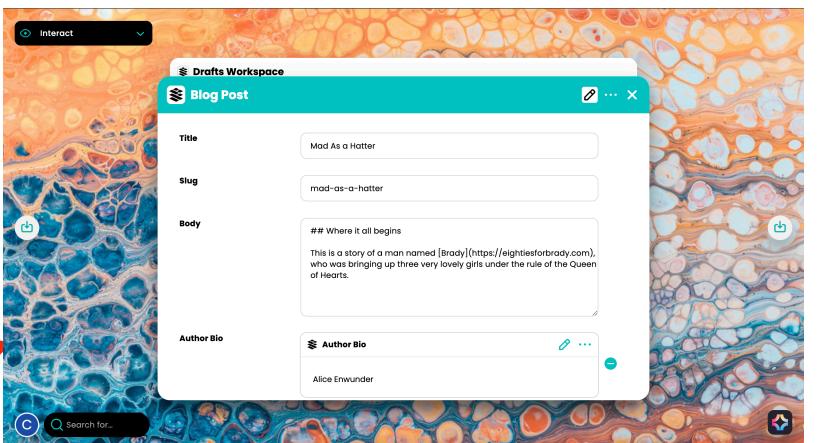

Create Card Instance from Customized Card Definition

# Cards Are Everywhere

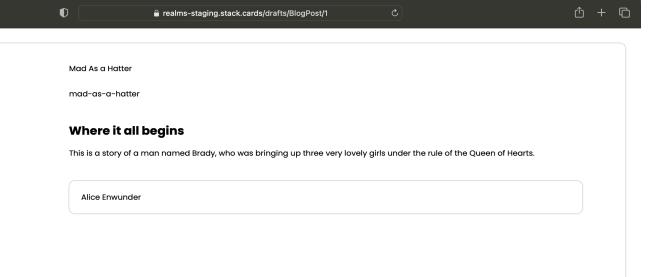

Cards are Searchable

A screenshot of the Drafts Workspace showing a "Blog Post" card. The card has fields for Title ("Mad As a Hatter"), Slug ("mad-as-a-hatter"), Body ("Where it all begins"), Author Bio ("Alice Enwunder"), Description, and Thumbnail URL. A red box highlights the "Title" field. A red arrow points from the "Title" field in this card towards the "Title" field in the bottom-most screenshot. A red box also highlights the "Body" field in the central card. A red arrow points from the "Body" field in the central card towards the "Body" field in the bottom-most screenshot. A red box highlights the "Author Bio" field in the central card. A red arrow points from the "Author Bio" field in the central card towards the "Author Bio" field in the bottom-most screenshot. A red box highlights the "Search for..." input field at the bottom left of the central card. A red arrow points from the "Search for..." input field in the central card towards the "Search for..." input field in the bottom-most screenshot.
